FUND BREAKDOWN / RISK

Risk across the book

Risk team [authors] | 100-150 words plus tables

AUTO

Gross exposure	Net exposure	Month drawdown	60-day volatility
142.3%	38.6%	2.1%	N/A
+6.1 pp vs Oct	−4.2 pp vs Oct	trough 18 Nov	41 of 60 daily returns

Exposure = % NAV. Drawdown = positive decline magnitude. Volatility annualised; N/A before 60 valid daily returns. Ex-ante (holdings-based) vol: 11.8%.

AUTO + EDIT

Team	Gross %	Net %	Gross — / net |	Largest abs. %	Priority / material issue
FIG / Financials	128	42		9.8	• Monitor Largest position near 10% cap
Healthcare	96	51		7.2	✓ Low No material change
Industrials	151	33		8.4	✓ Low No material change
Consumer	139	12		6.9	• Monitor Crowded short in apparel
Materials	88	63		11.4	▲ High Single name above cap
Energy & Utilities	104	47		8.1	✓ Low Oil beta 0.8
Special Situations	72	18		12.6	? Unassessed Unassessed: 2 new positions
TMT	187	58		9.1	• Monitor 31% of fund risk on 18% capital

Team exposures use team NAV. Largest = absolute position value / team NAV. Priority set by the risk team; the issue column is drafted from flags (e.g. limit proximity, crowded short) and edited.

What sector labels can hide

AUTO + EDIT

- Market beta 0.62 → beta-adjusted net 24.1% vs 38.6% headline.
- Momentum tilt +0.24; 3 teams long the same AI-capex theme.
- USD exposure 61% of gross; no FX hedge.
- Largest short: 4.1 days to cover, 9% SI of float.

Mandate checks and exceptions

AUTO

Limit	Actual	Limit	Status
Gross exposure	142.3	≤ 200	✓ OK
Net exposure	38.6	≤ 80	✓ OK
Largest position	9.2	≤ 10	• Near
Largest team position	11.4	≤ 10	▲ Breach
Sector net	21	≤ 30	✓ OK

Methods: valuation 16:30 London close, 30 Nov 2026; coverage 100% of positions; Bloomberg PORT (S07). Gross = (long + |short|) / NAV. Net = (long − |short|) / NAV.

FUND BREAKDOWN / SCENARIOS

Putting the risks to the test

Risk team [authors] | Two explicit scenarios and practical follow-up

SCENARIO A / US 10y yield +100 bp in one month, Bloomberg factor shocks

EDITORIAL

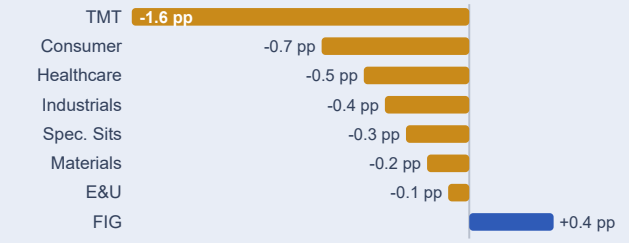

[Assumptions and transmission to each stock. State what is held constant, the coverage and the principal limitation.]

AUTO

FUND IMPACT

−3.4% NAV

−£101,800 · 100% coverage

Most affected teams

AUTO + EDIT

- TMT −1.6 pp: long-duration growth longs (3 names).
- Consumer −0.7 pp.
- FIG +0.4 pp offsets: bank longs gain on NIM.

[Limitation / response]

SCENARIO B / Rerun of Mar 2020 (20 trading days), historical returns

EDITORIAL

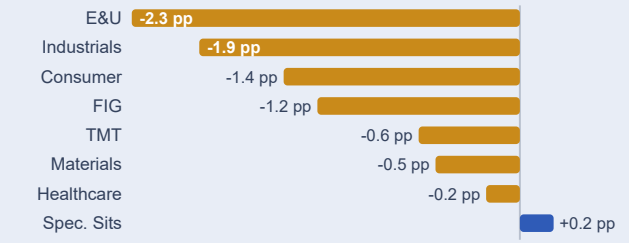

[Assumptions and transmission to each stock. State what is held constant, the coverage and the principal limitation.]

AUTO

FUND IMPACT

−7.9% NAV

−£236,500 · 96% coverage (2 IPOs proxied)

Most affected teams

AUTO + EDIT

- Energy & Utilities −2.3 pp.
- Industrials −1.9 pp.
- Shorts recover 3.1 pp of the long-book loss.

[Limitation / response]

Approximate P&L = Σ(signed market value × assumed stock return). Scenarios are neither forecasts nor maximum possible losses.
